

- Are aisles and passageways kept clear?
- Are wet surfaces covered with non-slip materials?
- Is there safe clearance for walking in aisles where motorized or mechanical handling equipment is operating?
- Are holes in the floor, sidewalk or other walking surface repaired promptly, covered or otherwise made safe for expected traffic?
- Are materials and equipment stored in such a way that sharp edges and parts will not interfere with the walkway?
- Are aisles or walkways that pass near moving or operating machinery, welding operations, or similar operations arranged so employees will not be subjected to potential hazards?
- Is adequate headroom provided for the entire length of any aisle or walkway?
- Are standard guardrails provided where aisle or walkway surfaces are elevated more than 30 inches above the adjacent floor or the ground?
- Are bridges provided over conveyors and similar hazards?
