

Take The Guesswork Out Of Compliance

The stakes are high and it is your job to help mitigate exposure to risk. At times, it can feel overwhelming....

Does your company face these operational challenges?

Problem: Limited regulatory knowledge within employee base

Consequence: Excessive time and effort spent to solve safety issues

Problem: Limited management focus on compliance activities

Consequence: Exposure to risk

Problem: Delegation of safety tasks without a central tracking mechanism for corrective actions

Consequence: Loss of control

Problem: Use of supervisors for periodic assessments

Consequence: Increased regulatory exposure and workers' comp costs

Solution: ASSUREDComplianceSM

All deliverables are customized to your site and culture. We partner with you and GUARANTEE our work. If you incur a citation for something we should have addressed, we pay for it!

Hellman & Associates Expertise

Since 1998, H&A has monitored ever-changing regulations, assessed job sites for hazards, trained English- and Spanish-speaking workers and documented comprehensive safety programs.

We are an attentive environmental health and safety (EHS) solutions provider. We believe customer satisfaction is achieved by balancing regulatory compliance and risk management with cost savings, timely service and common sense. H&A has extensive expertise in supporting manufacturing, construction, healthcare, oil & gas, pharmaceutical and service industries. But don't just take our word for it...

"I really believe that Hellman & Associates has our best interests at heart when making sure we're on top of regulatory requirements and the safety of our employees, however our relationship has also benefited our business directly. Not only has working with Hellman & Associates lowered our mod rate when it comes to worker's comp, our partnership provides us with safety credentials that are often necessary when we go in to bid on large contracts – at a significantly lower cost than hiring an in-house safety manager."

- Steve Davis, Coblaco Services

How Do You Manage Safety Today?

Take a look at your current EHS programs and ask yourself the following questions:

- Do you have an active safety and health program and do you manage hazards specific to your worksite?
- Is one person clearly responsible for the overall activities of the safety and health program?
- Do you have a safety committee or group made up of management and labor representatives that meets regularly and reports in writing on its activities?
- Do you have a working procedure for handling in-house employee complaints regarding safety and health?
- Are you compliant with training requirements?
- Is the training you deliver both engaging and informative?
- Do you track EHS data in order to measure the performance of your policies and programs?
- Can you ensure that all corrective actions are addressed with the appropriate follow-up and closure?
- Can you examine your data, see trends, and take action accordingly?

If all of these boxes are not checked, your organization is at risk. Isn't it time you took a proactive approach to compliance management?

Why Outsource Safety Management?

Instead of the limitations of a one-person resource, H&A offers access to a team of experts with advanced degrees and certifications as safety professionals and industrial hygienists – at a fraction of the cost.

More people. More experience. Less money.

You need a reliable and trusted partner. You need EHS management services that protect your workforce and keep your company in line with regulatory requirements. You need access to real-time, accurate data to ensure that regulatory and EHS programs are implemented effectively. You need to mitigate your organization's exposure to risk.

You need ASSUREDComplianceSM by Hellman & Associates.

Mitigate your exposure to risk. The ASSUREDComplianceSM solution includes:

- Initial Assessment
 - » Deficiencies identified
 - » Prioritization of issues
 - » Written report
- Compliance Calendar
- Safety Training
- Recordkeeping Requirements Managed
- Cost Containment Plan Development
 - » Prevention and loss control policy
 - » Creation or facilitation of a safety committee
 - » Designation of a medical provider
- Quality Assurance Visits
- Environmental Management and Support (optional)
 - » Stormwater permit management
 - » Air permit management
 - » Hazardous waste management
 - » DOT and IATA Hazardous Materials Shipping Training
- Project Documentation
- Claims Management Policies and Procedures
- Health/Safety Manual Development / Review
 - Safety Training Documentation
 - Staff Training Matrix

These components are organized in a scalable, robust software solution developed specifically to mitigate your business risk. The web-enabled interface allows access to real-time data of observed compliance issues identified during our site assessments of your operation. Data can be collected, analyzed and tracked in the field. This compliance management tool has been developed by our trusted strategic partner, **Beyond Compliance, Inc.**
