

**Ryan S. Hellman, MS**  
FOUNDER & PRINCIPAL

At Hellman & Associates (H&A), our **partnership with our clients** creates a highly responsive, cost-effective alternative to traditional project-based environmental health and safety (EHS) consultation.

We are an attentive service provider with the ability to provide unique and prompt EHS solutions. We believe customer fulfillment is maintained by balancing regulatory compliance and risk management with **internal cost savings, timely service and common sense**. H&A has extensive experience supporting manufacturing, construction, health care, oil & gas, pharmaceutical and service industries.

H&A offers EHS management services that **protect your workforce**, and keep your company in line with regulatory requirements – **for about half the cost of an in-house EHS manager**.

**BUILDING PARTNERSHIPS FOR A SAFER WORKPLACE**

## Partnership Services

### EHS Compliance Assurance Program

Keeping up with regulations, constantly monitoring job sites for hazards, training English and Spanish-speaking workers and documenting safety programs can be overwhelming. Let us serve as your outsourced EHS manager – **for about half the cost of an in-house EHS manager.**

### Construction Safety Support

The complexity of multi-employer worksites and the unique nature of construction hazards require continuous emphasis on safety and health issues for construction companies. H&A has extensive experience working with commercial and residential builders, general and prime contractors, and specialty trade contractors.

### EHS Services

H&A provides specialized support in a number of technical areas. Our certified safety and health professionals work with your organization to design a program for your site-specific compliance issues such as:

- Conduct a GAP analysis to measure compliance status
- Develop, implement and monitor specific EHS components
- Perform Loss Control and Risk Management Services

### Staff Augmentation

Whether caused by a transition in staff, a need for additional support for projects, or a requirement for our areas of expertise, we have a reputation of responding swiftly. We can support your in-house EHS staff or take on an urgent project.

### Safety Training

An educated workforce positively affects your company's safety culture. It helps reduce your workers compensation costs and accident rates as well as avoid OSHA penalties for noncompliance. H&A offers a full complement of EHS training for your leadership and workforce employees.

### Environmental Compliance

Regulations established by OSHA, EPA, DOT and state and local agencies require companies to comply with EHS requirements. There are fines and consequences related to noncompliance. We support:

- Water quality compliance
- Air permit requirements
- HMIS reporting
- Stormwater inspections
- DOT and IATA hazardous materials requirements
- Hazardous waste characterization and disposal
- Hazardous materials process safety

### Voluntary Protection Program (VPP) Support

Join the elite group that experiences **50% fewer workplace injuries**. Choose H&A as your VPP Certification partner.

### Database Management

H&A offers tools to support your data management requirements with stormwater inspection management and air permit emission inventory and reporting.

I really believe that Hellman & Associates has our best interests at heart when making sure we're on top of regulatory requirements and the safety of our employees, however our relationship has also benefited our business directly. Not only has working with Hellman & Associates lowered our mod rate when it comes to workers' comp, our partnership provides us with safety credentials that are often necessary when we go in to bid on large contracts – at a significantly lower cost than hiring an in-house safety manager.

— Steve Davis, President, Coblaco Services  
(Industrial Coating Service Company)
